

The sustainable and proven alternative
to power all your temporary projects

Revolt specializes in energy rental and power distribution

OUR COMMITMENTS

AT REVOLT, WE ARE FULLY AWARE OF TODAY'S SOCIAL AND ENVIRONMENTAL CHALLENGES.

We have defined a clear vision for our future goals:

our ambition is to collectively revolutionize the energy sector by offering our clients innovative and sustainable solutions for temporary power supply and electrical distribution.

Our aim is to become the leader in green energy by actively raising awareness among all stakeholders with significant energy needs and guiding them toward decarbonized solutions.

Responsibility

REVOLT aims to be responsible toward its clients, the environment, and its employees alike.

Commitment

REVOLT is committed to providing high-quality equipment through qualified teams, ensuring peace of mind for its clients.

Customer care

Always attentive to its clients, REVOLT is committed to their satisfaction by finding the solution that best meets each individual need.

Free Innovation

REVOLT offers tailored and customized services thanks to our design and engineering office.

Added Value

REVOLT strives to deliver real added value to its clients through its products, services, and expertise.

Technical Expertise

At REVOLT, our teams of technicians and technical sales experts provide tailored advice for every aspect of your project.

New brands: **Revolt Mobility**
& **Revolt Energy Green**

Specializing in rental and installation of temporary energy solutions, we provide reliable equipment for power, electrical distribution, and lighting.

Energy Green is dedicated to the manufacturing and sale of decarbonized energy solutions.

Revolt Mobility specializes in the sale and installation of electric vehicle charging stations and in the manufacturing of mobile solutions.

Customized solutions for asbestos removal and decontamination, with comprehensive services in electricity and air treatment.

Luminoz offers rental and installation of nature-themed decorative lighting.

Specializing in temporary electrical distribution, emergency lighting, and sound systems for events and trade shows in the West of France.

Revolt Power Green is a provider of decarbonized energy, committed to accelerating the energy transition.

OUR ENGINEERING

WE HAVE AN INTEGRATED DESIGN OFFICE THAT PLAYS A CRUCIAL ROLE IN OUR ABILITY TO PROVIDE TAILORED SOLUTIONS.

INNOVATION AT THE SERVICE OF ENERGY.

Our design office develops customized energy solutions. With a team of specialized experts and engineers, we are able to design energy systems perfectly adapted to your specific requirements, ensuring efficiency and sustainability.

➤ EVENT

RELIABLE ENERGY IS ESSENTIAL TO ENSURE THE SUCCESS OF EVERY EVENT.

Whether for festivals, concerts, trade shows, or sporting events, Revolt offers tailored energy solutions that are environmentally friendly and meet all your technical requirements. Our gensets and decarbonized power systems deliver optimal performance while reducing the carbon footprint of your events.

➤ CONSTRUCTION

THE CONSTRUCTION AND INFRASTRUCTURES INDUSTRY REQUIRES TEMPORARY BUT POWERFUL ENERGY.

Revolt provides robust energy solutions to power your sites, whether for construction, renovation, or infrastructure projects. Our innovative equipment is designed to operate in challenging conditions while minimizing environmental impact. With Revolt, you benefit from reliable and green energy, essential for your construction projects.

➤ PUBLIC SECTOR

LOCAL AUTHORITIES PLAY A KEY ROLE IN THE ENERGY TRANSITION.

Revolt works closely with them to provide temporary energy solutions tailored to their specific needs, whether for public events, emergency interventions, or infrastructure projects. Our decarbonized solutions help reduce CO₂ emissions and support local sustainable development initiatives.

➤ TELECOMMUNICATIONS

THE TELECOMMUNICATIONS INDUSTRY REQUIRES A CONSTANT AND SECURE POWER SUPPLY.

Revolt offers temporary energy solutions to ensure the continuity of telecommunication services, even during outages or maintenance. Our decarbonized power systems provide clean and reliable energy, essential for the proper functioning of telecommunication infrastructures.

A dedicated team available across France, 24/7 !

WITH OUR 7 AGENCIES ACROSS FRANCE, WE ARE PRESENT NATIONWIDE TO OFFER YOU PERSONALIZED, LOCAL ADVICE.

This national coverage allows us to respond effectively to your needs, wherever you are. Thanks to our presence, we support you with expertise and a local touch, ensuring optimal service tailored to your requirements.

SINCE 2012, THE COMPANY'S TECHNICAL AND SALES TEAM HAS DEVELOPED GENUINE EXPERTISE IN THE RENTAL OF ENERGY SOLUTIONS, ELECTRICAL DISTRIBUTION, AND LIGHTING EQUIPMENT.

REVOLT Location ensures the daily renewal and maintenance of its equipment fleet to always offer clients the latest innovations. Reliable, high-quality, and well-maintained equipment guarantees optimal service.

The expertise of a team of technicians and sales specialists enables REVOLT Location to provide tailored advice, supporting you with turnkey solutions for your projects. The company is committed to responding quickly to client needs thanks to its adaptability and responsiveness.

TURNKEY RENTAL SERVICES

Green Energy

REVOLT Location is revolutionizing temporary energy with eco-friendly and sustainable solutions. Our rechargeable battery packs, mobile solar panels, and hydrogen generators ensure an environmentally responsible energy supply.

Energy

REVOLT Location provides energy storage, power supply, and temperature control (heating and air conditioning) for temporary needs—whether for an event, construction site management, or industrial operations.

Distribution

REVOLT Location has recognized and sought-after expertise in electrical distribution, thanks to its wide range of panels, distribution boxes, junction boxes, and electrical cables.

Lighting

REVOLT offers a full range of equipment that enables event companies and service providers to illuminate large areas, secure venues, guide attendees, create zones, and set up pathways.

INDUSTRY & SERVICES

REVOLT ENERGY GREEN IS THE GO-TO PARTNER FOR INNOVATIVE, TEMPORARY, AND LOW-CARBON ENERGY SOLUTIONS.

Thanks to our engineering department, we design solutions that combine performance and environmental responsibility for events, construction sites, and municipalities.

We also create tailored solutions to meet your specific needs. Our experts work closely with you to develop solutions that perfectly align with your technical and ecological requirements.

INNOVATION AT THE HEART OF OUR APPROACH

- Tailored Energy Solutions for Every Project
- Installation across France and abroad
- A team attentive to your needs
- Reduced carbon footprint for your events
- Products combining durability and efficiency

A key player in your electric mobility and solar energy solutions

INDUSTRY & SERVICES

PUBLIC SECTOR

RESIDENTIAL

REVOLT MOBILITY SPECIALIZES IN THE SALE AND INSTALLATION OF SOLAR CARPORTS AND ELECTRIC VEHICLE CHARGING STATIONS.

Beyond our equipment, our team of experts supports clients throughout the entire installation process.

We guide them through each step and help them achieve their CSR goals through personalized advice and nationwide installation. Our specialists assist in selecting reliable, cost-effective, and sustainable charging solutions, as well as integrating solar carports tailored to every need.

COMPREHENSIVE SUPPORT FROM A TO Z

- From the very first contact, with tailored technical solutions
- Installation and follow-up included
- A team of certified professionals authorized to install our solutions
- A safe and swift implementation
- A selection of proven, easy-to-use products for diverse applications

Some of Our Services

24 HOURS OF LE MANS FESTIVAL - 2025

Installation of battery packs to power the festival stage organized alongside this iconic race.

For the occasion, we designed and implemented a hybrid green energy solution ensuring continuous power supply for sound, video, lighting, and backstage operations. The energy provided came from our battery packs, recharged via the grid and supplemented by a generator.

QUAI DE SEINE - 2024

Installation for EDF on the occasion of the Paris Olympic Games

Our teams set up a solar system on a pontoon on the Seine. This pontoon was used for a major sporting event at the end of July 2024. The system is capable of producing 330 kW per day. This equipment, made by Revolt, provides rapid deployment of solar panels for your temporary events.

MAINSQUARE FESTIVAL - 2025

Festival in Arras

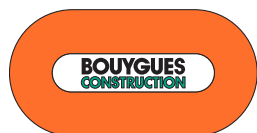

In July 2025, we powered the festival using our autonomous, zero-emission hybrid energy chassis (30kVA/60kWh), which notably supplied electricity to the VIP entrance area. Additionally, we provided distribution cabinets and boxes for the stages and the eco-cup cleaning station, along with lighting masts to secure and illuminate access points and circulation areas.
