

The sustainable and proven alternative
to power all your temporary projects

Revolt specializes in energy rental and power distribution

OUR COMMITMENTS

AT REVOLT, WE ARE FULLY AWARE OF TODAY'S SOCIAL AND ENVIRONMENTAL CHALLENGES.

We have defined a clear vision for our future goals:

our ambition is to collectively revolutionize the energy sector by offering our clients innovative and sustainable solutions for temporary power supply and electrical distribution.

Our aim is to become the leader in green energy by actively raising awareness among all stakeholders with significant energy needs and guiding them toward decarbonized solutions.

Responsibility

REVOLT aims to be responsible toward its clients, the environment, and its employees alike.

Obligation

REVOLT is committed to providing high-quality equipment through qualified teams, ensuring peace of mind for its clients.

Customer care

Always attentive to its clients, REVOLT is committed to their satisfaction by finding the solution that best meets each individual need.

Free Innovation

REVOLT offers tailored and customized services thanks to our design and engineering office.

Added Value

REVOLT strives to deliver real added value to its clients through its products, services, and expertise.

Technical Expertise

At REVOLT, our teams of technicians and technical sales experts provide tailored advice for every aspect of your project.

OUR BRANDS GROUPE REVOLT

OUR COMPANIES ARE COMMITTED TO SUPPORTING YOUR PROJECTS CLOSELY AND COLLABORATIVELY.

Specializing in rental and installation of temporary energy solutions, we provide reliable equipment for power, electrical distribution, and lighting.

Energy Green is dedicated to the manufacturing and sale of decarbonized energy solutions.

Revolt Mobility specializes in the sale and installation of electric vehicle charging stations and in the manufacturing of mobile solutions.

Revolt Power Green is a provider of decarbonized energy, committed to accelerating the energy transition.

Specializing in temporary electrical distribution, emergency lighting, and sound systems for events and trade shows in the West of France.

Luminoz offers rental and installation of nature-themed decorative lighting.

Customized solutions for asbestos removal and decontamination, with comprehensive services in electricity and air treatment.

Nexa Energy Africa specializes in the sale of innovative, temporary, and low-carbon energy solutions in Africa and the Middle East.

OUR ENGINEERING

WE HAVE AN INTEGRATED DESIGN OFFICE THAT PLAYS A CRUCIAL ROLE IN OUR ABILITY TO PROVIDE TAILORED SOLUTIONS.

INNOVATION SERVING ENERGY.

Our design office develops customized energy solutions. With a team of specialized experts and engineers, we are able to design energy systems perfectly adapted to your specific requirements, ensuring efficiency and sustainability.

> EVENT

RELIABLE ENERGY IS ESSENTIAL TO ENSURE THE SUCCESS OF EVERY EVENT.

Whether for festivals, concerts, trade shows, or sporting events, Revolt offers tailored energy solutions that are environmentally friendly and meet all your technical requirements. Our gensets and decarbonized power systems deliver optimal performance while reducing the carbon footprint of your events.

> CONSTRUCTION

THE CONSTRUCTION AND INFRASTRUCTURES INDUSTRY REQUIRES TEMPORARY BUT POWERFUL ENERGY.

Revolt provides robust energy solutions to power your sites, whether for construction, renovation, or infrastructure projects. Our innovative equipment is designed to operate in challenging conditions while minimizing environmental impact. With Revolt, you benefit from reliable and green energy, essential for your construction projects.

> PUBLIC SECTOR

LOCAL AUTHORITIES PLAY A KEY ROLE IN THE ENERGY TRANSITION.

Revolt works closely with them to provide temporary energy solutions tailored to their specific needs, whether for public events, emergency interventions, or infrastructure projects. Our decarbonized solutions help reduce CO₂ emissions and support local sustainable development initiatives.

> TELECOMMUNICATIONS

THE TELECOMMUNICATIONS INDUSTRY REQUIRES A CONSTANT AND SECURE POWER SUPPLY.

Revolt offers temporary energy solutions to ensure the continuity of telecommunication services, even during outages or maintenance. Our decarbonized power systems provide clean and reliable energy, essential for the proper functioning of telecommunication infrastructures.

A dedicated team available across France, 24/7 !

WITH OUR 7 AGENCIES ACROSS FRANCE, WE ARE PRESENT NATIONWIDE TO OFFER YOU PERSONALIZED, LOCAL ADVICE.

This national coverage allows us to respond effectively to your needs, wherever you are. Thanks to our presence, we support you with expertise and a local touch, ensuring optimal service tailored to your requirements.

REVOLT ENERGY GREEN IS THE LEADING REFERENCE FOR INNOVATIVE, TEMPORARY, AND DECARBONIZED ENERGY SOLUTIONS, DEPLOYING ITS TECHNOLOGIES ACROSS EUROPE.

Nexa Energy Africa, based in Casablanca and a subsidiary of Revolt Energy Green, handles the manufacturing and deployment of these solutions in Africa and the Middle East, maintaining the same high standards of quality and performance.

Thanks to our engineering department, we design, manufacture, and deploy custom, high-performance, and environmentally friendly solutions, perfectly tailored to the specific needs of each project.

Our mission: to offer sustainable and efficient alternatives to accelerate the energy transition, combining performance, reliability, and environmental responsibility.

INNOVATION IS CENTRAL TO OUR APPROACH

- Custom energy solutions for every project
- Installation across France and abroad
- A team attentive to your needs
- Reduced carbon footprint for your projects
- Products combining durability and efficiency

Together, let's make greener energy shine

PUBLIC SECTOR

AGRICULTURE

BUSINESSES

INDIVIDUALS

REVOLT POWER GREEN SPECIALIZES IN PROVIDING DECARBONIZED ENERGY AND IS COMMITTED TO ACCELERATING THE ENERGY TRANSITION.

Our mission is to make green energy accessible to everyone, combining the supply of 100% renewable electricity with solar solutions for self-consumption. Whether it's rooftop photovoltaic panels, solar canopies, or mobile solar containers, we offer reliable and optimized installations..

We assess needs, provide tailored solutions, and support our clients in reducing their carbon footprint while keeping their energy costs under control.

TAILOR-MADE SOLUTIONS FOR A SUSTAINABLE TRANSITION

- Installation throughout France
- A team attentive to your needs
- A reduction of your carbon footprint and electricity costs
- Custom solar solutions
- Creation of local energy communities committed to the ecological transition

A key player in your electric mobility

INDUSTRY & SERVICES

PUBLIC SECTOR

RESIDENTIAL

REVOLT MOBILITY SPECIALIZES IN THE SALE AND INSTALLATION OF ELECTRIC CHARGING STATIONS FOR VEHICLES.

Revolt Mobility is committed to offering solutions tailored to the specific needs of its clients and to the market demands. We provide two ranges of innovative solutions to support your transition to electric mobility: fixed charging stations and mobile charging stations.

Our equipment is high-performance, reliable, and easy to deploy, designed to meet the requirements of your site. Thanks to our dedicated engineering department — composed of experts and specialized engineers — we adopt a fully customized approach. We assess your needs, anticipate industry developments, and design products that combine performance, durability, and aesthetics.

COMPREHENSIVE SUPPORT FROM A TO Z

- From the very first contact, we provide tailored technical solutions
- Installation and follow-up included
- A team of certified professionals qualified to install our solutions
- Safe and fast implementation
- A selection of proven, easy-to-use products for a wide range of applications

Some of Our Services

24 HOURS OF LE MANS FESTIVAL - 2025

Installation of battery packs to power the festival stage organized alongside this iconic race.

For the occasion, we designed and implemented a hybrid green energy solution ensuring continuous power supply for sound, video, lighting, and backstage operations. The energy provided came from our battery packs, recharged via the grid and supplemented by a generator.

QUAI DE SEINE - 2024

EDF Installation for the Paris Olympic Games

Our teams set up a solar system on a pontoon on the Seine. This pontoon was used for a major sporting event at the end of July 2024. The system is capable of producing 330 kW per day. This equipment, made by Revolt, provides rapid deployment of solar panels for your temporary events.

MAINSQUARE FESTIVAL - 2025

Festival in Arras

In July 2025, we powered the festival using our autonomous, zero-emission hybrid energy chassis (30kVA/60kWh), which notably supplied electricity to the VIP entrance area. Additionally, we provided distribution cabinets and boxes for the stages and the eco-cup cleaning station, along with lighting masts to secure and illuminate access points and circulation areas.
